

OB1 Rolls out for Nigeria's Delta Rainbow Television

Avation today announced the shipping of its most recent television outside broadcast (OB) van, a 4 camera digital unit for Delta Rainbow Television, Channel 41 in Warri, Delta State, Nigeria.

When commissioned locally the unit will be used for live television coverage of news, political and sporting events.

Built inside a 2006 Dodge Sprinter Van OB1 comprises professional audio and video gathering equipment including Sony DXC-D50P triax camera's, DSR-1800AP VTR's and a Panasonic AG-MX70 8 channel mixer (upgraded to SDI).

Also included is a compact NLE unit and Sony DSR-250P camera's for interview work, additional Sony VTR's (DSR-25 and DSR-1500), a CCTV system for operator security, Marshall LCD monitors, audio and video distribution and facilities for connecting external sources, testing and signal conversions.

The OB van has its own power via means of an on-board generator and UPS. The link back to the station is via a portable Microwave system permanently mounted in the van.

Coachwork, fitout and testing were conducted in December 2006 in Singapore.
