

AVATION PLC
('AVATION' OR THE 'COMPANY')

INTERIM RESULTS ANNOUNCEMENT

CONSOLIDATED UNAUDITED RESULTS FOR THE SIX MONTHS ENDED 31 DECEMBER 2006

Avation the owner of commercial jet aircraft, which provides aircraft leasing, airline consumables as well as a business unit providing equipment to the broadcast industry, is pleased to announce its maiden set of interim results - for the six months to 31 December 2006.

HIGHLIGHTS

- Pre tax profits of GBP 246,243;
- Sales total GBP 591,296 for the interim period
- Earnings per share of 0.93p; and
- USD \$9.22m finance facility secured from the subsidiary of a major commercial bank.

POST PERIOD END HIGHLIGHTS

- Since the period end the Company has successfully closed the purchase of two Fokker F100 aircraft for a total consideration of USD \$8.85m;
- The two leased aircraft are expected to generate some USD \$1.8m per annum in revenue for a term of six years amounting to about USD \$10.8m in revenue;
- A further finance facility of USD\$4.1m has been secured - with a portion of the facility being earmarked to fund the purchase of a third commercial passenger jet aircraft.

The Chairman, Jeff Chatfield said "These results reflect only just over one month's aircraft leasing sales and profits and therefore we hope that our full-year results will demonstrate a business which is significantly larger in scale. Avation is well positioned to create value from its growing and efficient operations as has been demonstrated throughout the first half of this year. The Directors are confident that the Company will continue to show good progress for the year as a whole."

The directors take responsibility for the contents of this announcement.

Chairman's Statement

I present our maiden set of Avation Plc group interim results - for the six months ended 31 December 2006. This was a period of growth for the Company, which included the establishment of the business and an admission to PLUS in November 2006. The Company has made rapid progress securing substantial financing, building an asset base and securing revenue. We are happy to report an initial set of profit, turnover and earnings per share figures for the six months.

Trading

During the period we set up facilities to commence our aircraft leasing operations. As a result we have been able to significantly strengthen our asset base and develop long term revenue streams - the Company is currently leasing two aircraft for a term of six years. This will generate about USD \$10.8 million in revenue.

The planes are 100 seat commercial jets of type Fokker 100 which we understand have a useful life of over 25 years. The age of the aircraft we are buying is approximately at half-life, therefore these jets have significant remaining useful life.

The leases that we endeavour to place with the planes are structured so as to provide the Company with full ownership of the aircraft within five to six

years.

While the Company is exposed to the typical aviation industry risks and business cycles, the first two aircraft are utilized servicing the Western Australian resources industry, which we believe is in a significant growth phase. We believe this may continue for some period of time, thus ensuring aircraft utilisation and lease payment inflows.

The subsidiary that owns the aircraft is called F100 Pty Ltd and is incorporated in Australia. An arrangement is in place which protects the lessee from paying 10% withholding tax on lease payments. This gives the Company's clients a price advantage compared with off-shore aircraft lessors.

It is not the current intention of the Company to issue any further shares or instruments that may dilute the current shareholders' equity ownership.

The broadcast side of the business continues to service clients in Africa and is making a profitable contribution to the group. Negotiations are currently underway on a number of new projects from a rapidly growing base.

Outlook

These results reflect just over one month's aircraft leasing profits and therefore we hope that our full year results will demonstrate a business which is significantly larger in scale.

It is the Directors' intention to continue to grow the aircraft leasing business and increase its scale. To this end on 08 March 2007 we announced a further finance facility for USD \$4.1m for which we anticipate we will acquire our third aircraft. We expect this announcement to be imminent as negotiations are in a final stage.

Aviation is well equipped to create value for its shareholders from its growing operations and this has been demonstrated throughout the first half of this year. The Directors are confident that the Company will continue to show good progress for the year as a whole.

Jeff Chatfield
Chairman
Perth Australia,
Tuesday the 13th of March 2007
